

Brandon Shin

bmshin02@gmail.com ❖ (806) 928-6510 ❖ Santa Clarita, CA

Incoming Master of Software Engineering student at UC Irvine with experience developing software systems, interactive applications, and modular platforms across collaborative engineering environments. Skilled in system design, collaborative development, and adapting to new technologies using tools such as Git, Unity, Roblox Studio, PostgreSQL, and React.

EDUCATION

- ❖ **University of California, Irvine** Expected Dec 2027
Incoming Master of Software Engineering, Recipient of \$20,000 Student Fellowship
- ❖ **University of California, Riverside** B.S. June 2025
Bachelor of Science in Computer Science, Dean's Honor List

WORK EXPERIENCES

INDEPENDENT

July 2025 – Present
Online

Software Engineer

- **Developed** interactive multiplayer systems and modular software architecture mainly using **Roblox Studio** and **Luau**
- **Implemented** scalable gameplay systems, persistent player data, and reusable UI frameworks
- **Collaborated** with project stakeholders to prioritize and implement gameplay features within development deadlines
- **Contributed** to projects generating 50,000+ total platform/game visits

UCR, XCITE

April 2023 – June 2025
Riverside, CA

Software Engineer

- **Developed** academic software and interactive learning tools to support undergraduate education at UC Riverside.
- **Partnered** with four professors across diverse disciplines to **design** interactive XR programs
- **Led** a cross-functional team (two designers, one programmer) for two years, **delivering** interactive programs for students
- Worked with **Unity**, **Xcode**, **TestFlight**, **GitHub**, and **VS Code** to support collaborative application development and deployment.

RELEVANT EXPERIENCES

CYPHER CODE | C#, Unity, AR, IOS Development

October 2023 - June 2025

UCR, XCITE

- Collaborated with Professor Ryan Rusich to **architect** an AR-based application demonstrating fundamental encryption and decryption principles for an introductory Computer Science course (CS005).
- **Presented** to 100+ students, earning **highly positive** feedback via structured surveys.
- **Continuing development** with Prof. Rusich to **extend** the application's scope and encompass a broader range of computer science concepts.

THEATRE IN XR | C#, Unity, VR, Education

January 2025 - March 2025

UCR, XCITE

- Partnered with XCITE's Executive Director, Dr. Richard Edwards, as a **Teaching Assistant** to **design** a specialized course integrating theatrical elements into VR experiences for 16 students.
- **Developed** multiple Wuxia-inspired Romeo and Juliet VR prototypes for two student teams, **iterating** on user feedback to refine immersive storytelling.

AUTONOMOUS CAR | Python, Machine Learning, Embedded Systems

January 2025 - March 2025

CS 179J (Senior Design Project)

- **Engineered** a miniature line-following car alongside three peers, leveraging OpenCV for **real-time** path and sign recognition.
- Served as a **Software Engineer**, utilizing OpenCV to **implement** a robust machine learning solution for object detection and navigation.

EQUILIBRICHEM | C#, Unity, XR, GitHub, IOS Development

July 2023 – September 2024

UCR, XCITE

- **Developed** an interactive simulation illustrating dynamic molecular equilibrium, accurately modeling **temperature**, **pressure**, and **concentration** changes.
- **Led** and collaborated with two teammates to **implement** both VR and AR experiences in Unity, aligning with foundational chemistry coursework led by Josh Hartman.

SKILLS

- **Skills:** Unity, Roblox Studio, XR, IOS Development, Graphics Design, Photoshop, After Effects, Premiere Pro
- **Languages:** C++, C#, C, Python, Java, Javascript, Luau, SQL, PostgreSQL.
